Profile Summary:

Software Engineer specializing in Data Structures & Algorithms, backend development (Spring Boot), and AI-driven systems. Proven experience in building scalable applications, optimizing performance, and solving complex real-world problems.

Skills:

- **Programming:** C++, Java, Python, C
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Backend & Development:** REST APIs, FastAPI, Machine Learning, Deep Learning, RAG, Prompt engineering
- **Database:** PostgreSQL, MySQL
- **Tools & Platforms:** Postman, Docker
- **Interpersonal Skills:** Problem Solving, Collaboration, Adaptability

Education:

- BE- Computer Science | Chandigarh University, Mohali *CGPA: 8.72 | (Aug '23 - July'27)*
- XII (CBSE) | MLD Yaduvanshi Sr. Sec. School *93%| 2022*
- X (CBSE) | MLD Yaduvanshi Sr. Sec. School *91%| 2020*

Projects:

CareBridge — Healthcare Assistance Platform

(Aug '25)

- Developed a location-based healthcare platform connecting users with nearby hospitals using Google Maps API, with scalable RESTful backend for real-time assistance.
- **Tech:** Java, Spring Boot, PostgreSQL, REST APIs, Google Maps API

YouTube Comment Sentiment Analyzer— Machine Learning

(Dec '25)

- Developed a machine learning-based system that takes a YouTube video URL, fetches comments using YouTube Data API, and performs sentiment analysis (positive, negative, neutral) with 85%+ accuracy.
- **Tech:** Python, Scikit-learn, Pandas, NLP, YouTube Data API

AI-Powered GitHub Repository Q&A System

(Feb '26)

- Built a Retrieval-Augmented Generation system to analyze GitHub repositories, processing 1,000+ files and improving response relevance by ~40% using vector embeddings, semantic search, and LLM integration.
- **Tech:** Python, FastAPI, LangChain, ChromaDB, OpenAI API, RAG

Experience/Achievements:

- **Solved 1000+ DSA Problems** on Leetcode, GFG & Codeforces.
- Achieved **Specialist** rating on [Codeforces](https://codeforces.com/), **Knight** badge on [LeetCode](https://leetcode.com/) and maintained a 650+ day streak in Japanese language learning on Duolingo.
- **1st position in Inspirathon 1.0**, a team-based coding competition organized by CodeChef at CU.
- Earned Spring Boot certification from [Infosys Springboard](https://infossys.com/).
- **Certified Basic Japanese Speaker**, showcasing multilingual communication skills and global adaptability.
